"I salute the folks at DURATION® for developing the next generation of sustainable, high-performance exterior trim, made entirely from Boral® TruExterior® Trim and Siding. Poly-ash composite material is impermeable, won't rot, twist, check, or crack - it barely shrinks or expands, can be painted any color (even black!), mills extremely smooth, can be fastened with finish nails, and takes paint without any special preparation. Like most carpenters, wood is always my first choice, but for projects where low maintenance is desired or where material is exposed to harsh conditions, DURATION® is an easy-to-install and reliable solution."

-Gary Katz

Do it ONCE, Do it RIGHT... DURATION®

Use DURATION® Moulding and Millwork wherever moisture, sunlight, rot, decay, or temperature extremes will have their way with wood, PVC, or cement based products... and where you want tight joinery normally only found with wood construction.
